

## Developing Digital Professional Portfolios with Preservice Teachers to increase their understanding of Graduate Attributes and Teacher Competencies.

Digital Portfolios  
Graduate Attributes  
Teacher Competencies

During this session I would like to describe a digital portfolio framework developed through a University Teaching and Learning grant. In conjunction with Alistair Campbell and trialed by a small group of second year education students I have designed a framework which builds on the technology skills developed by the students in an ICT unit in the second semester of their teacher-training program. The framework is designed to assist students to digitally store and present evidence of their work as learners and teachers in a professional digital portfolio. Students collect evidence from University units and teaching practices. By learning to choose and match specific pieces of evidence to the framework, students develop a thorough knowledge and understanding of both the Graduate Attributes and the Teacher Competency Framework. Evidence is converted into digital files and using Dreamweaver and a web site concept the portfolio is created. During this workshop students who are developing their digital portfolios will present their 'work in progress' and discuss the challenges they have faced.

### Presenter details:

Name of session presenter/coordinator: Ms Jenny JAY

Position and institution: Lecturer, Edith Cowan University, Kindergarten through Primary Program, Joondalup.

Contact details: Edith Cowan University,  
100 Joondalup Drive,  
Joondalup 6027  
Telephone: 6304 5125  
Fax: 6304 5850  
e-mail: [j.jay@ecu.edu.au](mailto:j.jay@ecu.edu.au)

Other presenters: Two students will also be presenting their work.
